

# IoT and Cloud based framework for machine & productivity data

Avoid lengthy trial-and-error projects and get started immediately

## Discover our Industrial IoT project accelerator

### Secure and scalable

Deployed in your own MS Azure subscription using a scalable architecture

### Fully integrated in your environment

Multiple interfaces to integrate with business and data analytics applications

### Out-of-the-box functionality

Offering all Inimco.facts features and additional connectivity modules

### Custom development

Supporting new use cases, connectivity modules, UI & API customizations and more

- ✓ Fully open architecture deployed in your own cloud environment
- ✓ Build-in multi-tenancy, authentication and RBAC model
- ✓ API abstraction layer between internal & external data sources
- ✓ Template based, customizable web portal for end-users
- ✓ OT connectors for OPC UA, Modbus, LoraWan, Advantech Wise
- ✓ Software subscription model to stay up-to-date
